Change of material in the right of way for the strip separating the driving lane from the parking lane

Staff report: On March 1, 2023, the Board was briefed about the change to the materials to the materials approved in Certificate of Approval 14422 for the East West Streets project. During the meeting Board members expressed support for the change of the parking strip material. After discussions with the Alliance for Pioneer Square, Waterfront Seattle is proposing to use the same colored concrete as the parking strip, untextured and unscored rather than the exposed aggregate strip they previously proposed to replace the granite pavers.

Draft Motion: I move to recommend granting a Certificate of Approval for:
Change of material to in the right of way for the strip separating the driving lane from the parking lane as presented.

The Board directs staff to prepare a written recommendation of approval based on considering the application submittal and Board discussion at the *April 5, 2023* public meeting and forward this written recommendation to the Department of Neighborhoods Director.

Pioneer Square Preservation District Rules

III. GENERAL GUIDELINES FOR REHABILITATION AND NEW CONSTRUCTION

In addition to the Pioneer Square Preservation District Ordinance and Rules, The Secretary of the Interior's Standards for Rehabilitation with Guidelines for Rehabilitating Historic Buildings, and the complete series of Historic Buildings Preservation Briefs developed by the National Park Service shall serve as guidelines for proposed exterior alterations and treatments, rehabilitation projects, and new construction. (7/99)

Rehabilitation is defined as the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features which convey its historical, cultural, or architectural values. (7/99) In considering rehabilitation projects, what is critical is the stabilization of significant historical detailing, respect for the original architectural style, and compatibility of scale and materials.

The following architectural elements are typical throughout the District and will be used by the Board in the evaluation of requests for design approval:

- G. Street Paving. Streets within the District are to be paved according to standard Engineering Department practices with a weaving coat of asphalt concrete.

- H. Curbs. Where granite curbing presently exists, it will be the required replacement material. In other instances the same concrete and lampblack mixture used for the sidewalk will be used.
