

Rainier View Elementary Safe Routes to School Project: Construction begins as soon as January 2, 2018

OVERVIEW

As soon as January 2, 2018, crews will begin constructing pedestrian safety improvements in your neighborhood. This project will add marked crossings, curb bulbs, and traffic calming measures such as speed humps to make it safer and easier for kids to walk and bike to school (see map). This work is part of the Rainier View Elementary Safe Routes to School Project.

SCHEDULE

We expect construction to last through April 2018, depending on weather. Crews will begin work at S Bangor St and 51st Ave S before moving south to 55th Ave S and Beacon Ave S. Crews will begin with minor work, such as surveying, before they begin construction on the first corner. We plan to coordinate work on 55th Ave S directly in front of Rainier View Elementary School with the school's mid-winter break (February 19-23) to reduce impacts to school traffic as much as possible.

PROJECT BACKGROUND

We are committed to making it safer and easier for kids, families, and neighbors to walk and bike in your neighborhood. This project will:

- Improve safety and access on the walking and biking route to school
- Provide safety education so kids have the skills they need to safely walk and bike to school
- Encourage more kids to walk and bike safely to school, which will reduce congestion at the school

This project will help achieve Seattle's Vision Zero to end traffic deaths and serious injuries by 2030. The Safe Routes to School (SRTS) program is funding project design as well as the education and encouragement programs. Project construction is funded by a Washington Department of Transportation SRTS grant and the 9-year Levy to Move Seattle, approved by voters in 2015.
