Landscape Professionals

Give your customers what they want

The fastest growing sector of the landscape industry is providing "green" services that minimize chemical use and water waste, and maximize plant health and efficient resource use. Get started with [Natural Landscaping: Design, Build, Maintain](#) (pdf), or in Spanish [Paisajismo natural: Diseño, Construcción, Mantenimiento](#) (pdf).

Sustainable Landscaping Topics

- [For Property Managers](#) Connect to SPU services, find a landscaper, develop a maintenance contract, save money on irrigation, or learn how to maintain your own landscape.
- [Landscape Design & Construction](#) Learn about code requirements and best practices for soils, stormwater, trees, and overall sustainable design.
- [Soil Best Practices](#) Learn about new code requirements to protect and restore soil quality on every construction site.
- [Lawns, Plants & Trees](#) Best practices for healthy landscapes, plus links to code requirements and resources to learn more.
- [Landscape Maintenance Plans](#) Use these examples to develop professional plans that sell your services to homeowner associations, institutions, and residents.
- [Integrated Pest Management](#) Pest identification and least toxic control methods – safer for your staff and customers, wildlife, and our environment.
- [Irrigation System Tips & Rebates](#) Professional automatic irrigation system resources for commercial customers, and links to rebates for business and home irrigation systems.
- [Training Opportunities](#) for landscape professionals – register now for upcoming workshops or view previous presentations. También vea [entrenamiento profesional en español](#).

Questions? Call the Garden Hotline For IPM and other landscape questions, or to request a print copy of one of the guides or factsheets, call the **Garden Hotline (206) 633-0224** or email help@gardenhotline.org.
