

**Drainage & Wastewater Main Extension
Determination Review Request**
For Storm, Sewer and Combined Mains

Return completed form to SPU's Development Services Office at spu_dso@seattle.gov

Project Address:

Street Apt City State Zip

Applicant:

_____ Date: _____

Contact Email:

_____ Telephone: _____

Contact Mailing Address:

Street Apt City State Zip

Design Professional:

WAC #:

_____ DPD Project # _____

MUP # (if applicable)

_____ SIP # (if applicable) _____

Please check applicable utilities for this clarification request:

Sanitary Sewer Main

Combined Sewer Main

Storm Main

Ditch/Culvert System

Project Scope	
Zoning	
Total new/replaced impervious surface area	(sq ft)
Total footprint of building (s)	(sq ft)
Total number of dwelling units	
Market Value of completed project (estimated total project value)	
DPD construction valuation	
Estimated cost of extension requirement	
Estimated cost of proposed alternative (if any)	

Right of Way				
Distance of property line to nearest main (s)	Combined	Sewer	Storm	(ft)
Designation:	arterial	residential	alley	Other
Curb height:	(in)			
Pavement type:	concrete	asphalt	asphalt over concrete	Other
Existing drainage infrastructure:				

Please use additional pages if needed:

State the decision or requirement to be clarified:

State the proposed alternative solution(s):

Reason(s) for clarification request (provide facts, documented exceptions, and any other supporting reasons)

Suggested information to be included in request:

Providing the additional information listed below may help the review committee come to a more informed, complete and timely decision. Format of request should be filling in all that applies to your project on the first page of this document with supporting documents attached. All documents should be transmitted to SPU electronically. Depending on the nature of the request, some of the items listed below may not be applicable.

Narrative describing the project:

- x Describe the project: include the zoning, planned or completed platting/LBA's, number of new dwelling units vs. existing buildings
- x Describe the change from existing to new dwelling units or of impervious surface area –existing and proposed impervious surface.
- x Describe the current ROW conditions
- x Project specific factors which you would like the committee to consider such as utility conflicts or other technical concerns such steep slopes, potential to infiltrate drainage onsite, etc.
- x Proposed outcome or alternatives if the same function as the code requirement is met (note: meeting the same function is not necessarily just serving the proposed project).

Supporting documents:

- x Proposed Site, Utility, and/or Drainage Plan
- x Existing Site Photos of relevant onsite or ROW features, e.g. curb flow line, project ROW frontage, ditches.
- x Applicable Side Sewer Cards
- x Geotechnical/drainage report as applicable
- x Cost estimates for required and proposed alternative (if any) if the basis is financial hardship provide separate line items for all costs.
